

Datasets for the Aqua Ask Embeddings

Verified sources to add to the knowledge base through the upload feature (POST /api/upload). Compiled September 2026.

[US] = US federal source; it covers the United States only.

Datasets to embed

Problem 1 · Water-borne disease and sanitation

WHO/UNICEF Joint Monitoring Programme (JMP)

Publisher: WHO & UNICEF | **Coverage:** Global, 200+ countries, 2000–present

The official global source on drinking water, sanitation and hygiene.

What to embed: The global progress reports and the country reports for the platform's cities' countries (Nigeria, Kenya, Indonesia, Philippines, India, Viet Nam, South Africa and others). They explain the figures in plain language, which is what makes them useful for search.

Upload as: PDF

<https://washdata.org/data>

Problem 1 and 5 · Water-borne disease; school-level risk

JMP WASH in Schools

Publisher: WHO & UNICEF | **Coverage:** Global, 2000–2021

Water, sanitation and hygiene in schools, which gives students a direct link to their own school.

What to embed: The WASH in Schools report text.

Upload as: PDF

<https://data.unicef.org/resources/jmp-wash-in-schools-2022/>

Problem 2 · River pollution and antimicrobial resistance

WHO GLASS (Global Antimicrobial Resistance and Use Surveillance System)

Publisher: World Health Organization | **Coverage:** 141 countries, 2016–2023

Official global surveillance of antibiotic resistance and antibiotic use.

What to embed: The GLASS reports, which explain resistance trends and what they mean. Keep the dashboard numbers for the map instead.

Upload as: PDF

<https://www.who.int/initiatives/glass>

Problem 1 · Water-borne disease outbreaks

CDC National Outbreak Reporting System (NORS) **[US]**

Publisher: US Centers for Disease Control and Prevention (with EPA) | **Coverage:** United States, 1971–present

Waterborne outbreak reports: date, location, number of people ill, symptoms, pathogen, setting and water source.

What to embed: The waterborne outbreak records. Convert each row into one sentence first, for example: "In [year] in [state], a [pathogen] outbreak linked to [water source] made [number] people ill." Raw spreadsheet rows retrieve poorly.

Upload as: TXT or CSV (one sentence per outbreak)

<https://www.cdc.gov/nors/index.html>

Before uploading

- **Size:** each upload is limited to 20 MB. Split larger reports into parts.
- **Text-based PDFs:** these reports have a text layer, so they don't need Gemini transcription.
- **Licensing:** WHO and UNICEF publications are generally free to reuse with attribution. Check the licence stated in each report. CDC data is US public domain.
- **Citations:** Aqua Ask cites uploads by file name, so name each file clearly, e.g. *JMP_2025_Global_Report.pdf*.
